Koffman AutoWorks

Digital Presence &
Marketing Proposal

PREPARED BY

Tina Biancalana

DATE

May 19, 2026

VALID THROUGH

June 17, 2026

PSG

— CURRENT STATE

Where You Stand Today

CRITICAL

No Conversion Tracking

There is no GA4, no call tracking, and no form attribution in place. You have no way to know which marketing channels are driving customers through your door — or which ones are wasting money.

CRITICAL

Fragmented Vendor Stack

Hibu, Turnkey, Shopgenie, and AutoFix operate in silos. No shared data, no unified reporting, and no single team accountable for the full picture. You're managing four vendors instead of one strategy.

NEEDS WORK

Minimal Post-Repair Follow-Up

Current follow-up touches fewer than 10% of Collision customers and delivers only one contact. There is no warranty reminder and no one-year check-in to convert first-time customers into repeat business.

NEEDS WORK

Google Review Gap

41 Google reviews is below the threshold most customers expect before choosing a shop. Competitors in the Rolling Meadows market have 3–5× more reviews. No active review request process is in place.

OPPORTUNITY

No Unified Digital Dashboard

Website performance, ad spend, review volume, and follow-up rates are tracked in four separate systems — if they're tracked at all. A single connected reporting view would give Heather and Larry a clear picture of what's working.

— THE RECOMMENDATION

A Website Built for Koffman.

COLLISION DEPARTMENT

Insurance Partner Pages

Dedicated landing pages for each DRP relationship — State Farm, Allstate, USAA — that rank for insurance-specific searches and build trust before the first call.

Repair Process Transparency

Step-by-step repair content that answers the questions collision customers ask before choosing a shop — reducing friction and building confidence.

Rental & Towing Integration

Clear, prominent information about Enterprise partnership and towing coordination — two of the highest-searched concerns for collision customers.

SERVICE DEPARTMENT

Service Menu & Booking Path

A complete service menu with clear pricing ranges and a direct path to schedule — reducing phone volume and capturing more service appointments.

Local SEO Architecture

Location-specific service pages structured for Google's local algorithm — targeting "oil change Rolling Meadows" and similar high-intent searches your competitors are winning today.

GA4 + Call Tracking from Day One

Every visit, call, and form submission tracked and attributed. You'll know which marketing channels are driving real customers — not just clicks.

WHAT YOU OWN AT DELIVERY
Domain
Registered in your name. Yours forever.

Design
Custom to Koffman. Never templated.

Source Code
Full codebase delivered to you at launch.

All Content
Every page, every image — yours to keep.

Analytics Data
GA4 property in your Google account.

— POST-REPAIR FOLLOW-UP

Stay Connected After Every Repair.

01 48 HOURS AFTER PICKUP Thank You & Quality Check

A personal thank-you from the Koffman team. Acknowledges the repair, invites the customer to reach out with any questions, and gently requests a Google review.

LETTER OR EMAIL

02 30 DAYS AFTER PICKUP Warranty Reminder

Reminds the customer of their repair warranty terms. Reinforces trust and positions Koffman as the shop that stands behind its work — not just at delivery, but a month later.

LETTER OR EMAIL

03 1 YEAR AFTER PICKUP One-Year Check-In

A check-in on the vehicle's condition, a reminder of Koffman's service department, and an invitation to return. Turns a one-time collision customer into a long-term relationship.

LETTER OR EMAIL

HOW IT WORKS

STEP 01 Weekly CSV from Tekmetric

Your team exports completed repairs from Tekmetric each week. No new software or integration required.

STEP 02 PSG Processes & Schedules

PSG ingests the list, deduplicates, and schedules each customer into the 3-touch sequence at the correct intervals.

STEP 03 Touchpoints Delivered

Letters printed and mailed, or emails sent — on-brand, personalized, and precisely timed. Monthly reporting included.

BASE RATE

\$5

per customer · full 3-touch
sequence

OPTIONAL SURVEY ADD- ON

+ \$3

per customer · satisfaction
survey

Be Found Everywhere Your Customers Are Looking.

05

Digital Presence Management

\$375 / mo

- 200+ directories synced — Google, Apple Maps, Yelp, Bing, Facebook & more
- Website hosting, SSL, uptime monitoring & security updates
- Voice & AI optimization — Siri, Alexa, Google Assistant, AI search
- Monthly visibility score & listing health report

One inaccurate listing can cost you a customer. PSG maintains your business data across every platform so your name, address, phone, and hours are always correct — no matter where someone finds you.

Online Review Response

\$175 / mo

- Google + Facebook reviews monitored and responded to daily
- 24-hour response — no review sits unanswered for more than one business day
- On-brand voice — professional, personal, and genuine to Koffman
- Negative review escalation protocol with recommended resolution steps

Google's algorithm rewards businesses that respond to reviews. Potential customers read your responses before they call. A thoughtful reply to a negative review often converts more customers than five positive ones.

Google Business Profile Posting

\$175 / mo

- 4 posts per month — promotions, seasonal content, service spotlights
- Q&A monitoring — customer questions answered promptly
- Fresh shop and team photos uploaded regularly
- Monthly insights — profile views, search queries, direction requests

An inactive Google Business Profile signals to both Google and customers that a business isn't paying attention. Regular posting keeps Koffman visible in the local pack and gives customers a reason to choose you.

— PAID SEARCH

Google Ads Management

HOW IT WORKS

01 You Set the Budget

There is no minimum spend requirement from PSG. You decide how much goes to Google each month — whether that's \$500 or \$5,000. PSG advises on what's competitive for your market, but the decision is always yours.

02 Your Account, Your Data

Campaigns run inside a Google Ads account registered to Koffman AutoWorks. You have full access and full ownership. If you ever leave PSG, you take the account history, audience data, and every conversion record with you.

03 PSG Manages the Campaigns

Keyword research, ad copy, bid strategy, negative keyword management, landing page alignment, and monthly performance reporting. We optimize continuously — not just at launch.

MANAGEMENT FEE

\$500

per month · flat fee

WHAT'S INCLUDED

- Campaign setup & structure
- Keyword research & negative lists
- Ad copy writing & A/B testing
- Bid & budget optimization
- Conversion tracking setup
- Monthly performance report

TRANSPARENCY

Your ad dollars go directly to Google — billed to your card or your Google Ads account. PSG charges a flat \$500/mo management fee with no markup on media spend and no bundled invoices that hide where your money goes.

— YOUR MARKETING PARTNER

One Team. One Invoice. One Strategy.

---	--	--

Not WordPress.

NEXT.JS + SANITY.IO — PSG		WORDPRESS (CURRENT STANDARD)
Page Speed	✓ Sub-2-second load times. Static generation means pages are pre-built and served from a CDN — no server processing on each visit.	— Average 4–6 second load times. Plugin overhead and server-side rendering create consistent speed penalties that hurt rankings and conversions.
AI Search	✓ Clean JSON-LD structured data and semantic HTML make PSG sites highly readable by Google SGE, Bing Copilot, and AI-powered search engines.	— Plugin-dependent schema markup is inconsistent and often malformed. AI search engines struggle to parse WordPress sites accurately.
Security	✓ No plugin vulnerabilities. Static architecture means no database to attack, no admin login to brute-force, and no plugin update cycle to manage.	— 43% of WordPress sites have at least one known vulnerability. Constant plugin updates required to maintain basic security hygiene.
Content Updates	✓ Sanity.io provides a clean, intuitive editing interface. Update service descriptions, add photos, or post specials without any developer involvement.	— Gutenberg editor is functional but inconsistent. Theme conflicts and plugin dependencies frequently break the editing experience after updates.
Ownership	✓ Full source code delivered to Koffman at launch. Hosted on infrastructure you control. No vendor lock-in — take the code anywhere.	— Hosting and theme licenses are often tied to the agency. Canceling the relationship can mean losing access to your own site.

FOR CUSTOMERS

A fast, mobile-first experience that loads before a competitor's site even starts rendering — reducing bounce rate and increasing contact form submissions.

FOR GOOGLE

Core Web Vitals scores in the top percentile for automotive service sites — a direct ranking signal that compounds over time as competitors stay on slow platforms.

FOR YOUR TEAM

A CMS your service advisors can actually use. Update hours, add a promotion, or swap a photo in under two minutes — no IT ticket required.

— INVESTMENT

Priced à la Carte.

ONE-TIME WEBSITE BUILD

\$8,000 – \$12,000

Custom design, development, content migration, GA4 setup & launch. Scoped after discovery.

Final investment depends on scope, number of pages, and integration requirements.

\$5 /customer

Google Ads Management

Flat management fee · your budget · your account

\$500 /mo

RECOMMENDED STARTING POINT

\$725 /mo

A focused foundation that builds visibility, protects your reputation, and keeps your presence consistent across every platform.

INCLUDES

- Digital Presence Management **\$375**
- Online Review Response **\$175**
- Google Business Profile Posting **\$175**

Add Google Ads management for \$500/mo when ready to activate paid search. Post-repair follow-up priced per customer based on monthly repair volume.

NOTE

Ad spend goes directly to Google — billed to your account. PSG charges a flat management fee only. No markup on media spend.

SUCCESS METRICS

What We're Building Toward.

METRIC	CURRENT STATE	90-DAY TARGET	12-MONTH TARGET
Organic Website Visits Monthly sessions from Google search	Baseline No GA4 tracking in place	500+ per month	1,200+ per month
Tracked Leads Calls + form submissions attributed to digital	0 No attribution tracking	20+ per month	50+ per month
Google Reviews Total review count on Google Business Profile	41 No active request process	65+ total reviews	120+ total reviews
GBP Profile Views Monthly impressions on Google Business Profile	Unknown Not currently monitored	800+ per month	2,000+ per month
Post-Repair Follow-Up Rate Collision customers receiving all 3 touches	<10% Single-touch, inconsistent	80%+ of eligible customers	95%+ of eligible customers

MEASUREMENT | All metrics tracked in a shared GA4 dashboard and delivered in a monthly performance report – so Heather and Larry always know exactly where things stand and what's moving the needle.

Built for This Industry. Accountable for Results.

	PHOENIX SOLUTIONS GROUP	TYPICAL MARKETING AGENCY
Asset Ownership	✓ You own the domain, source code, content, and GA4 data from day one. Nothing is held hostage if you ever leave.	— Website and creative assets often revert to the agency upon contract termination. Clients frequently start over from scratch.
Ad Spend	✓ Flat \$500/mo management fee. Your ad dollars go directly to Google — no markup, no bundling, full transparency on every dollar spent.	— Typical agencies charge 15–20% of ad spend as a management fee, creating a financial incentive to increase your budget regardless of performance.
Industry Focus	✓ Automotive service and collision repair is PSG's primary vertical. We understand DRP relationships, Tekmetric, and the collision customer journey.	— Most agencies serve dozens of industries simultaneously. Your account manager likely has no automotive experience and learns on your dime.
Technology	✓ Next.js + Sanity.io — purpose-built for performance, AI search visibility, and long-term ownership. No plugin dependencies, no technical debt.	— WordPress with a premium theme. Fast to deploy, slow to load, and dependent on a plugin ecosystem that requires constant maintenance.
Contract Terms	✓ Month-to-month after the initial 90-day launch period. We earn your business every month — not through lock-in clauses.	— 12–24 month contracts are standard. Early termination fees are common, and performance guarantees are rarely included.

PSG's business model is aligned with yours. We grow when you grow. Every service is priced transparently, every asset is owned by you, and every result is measured against goals we define together before work begins.

Next Steps.

01 Review This Proposal

Take time to review the services, pricing, and scope. Share with Heather and Larry — we want everyone aligned before moving forward.

02 Schedule a Follow-Up Call

Tina will schedule a 30-minute call to walk through any questions, clarify scope, and discuss which services make sense to start with. No pressure — this is a conversation.

03 Select Your Starting Services

Choose the combination that fits your current priorities and budget. All services are à la carte — you can add or adjust at any time.

04 Sign the Service Agreement

PSG will prepare a simple service agreement covering scope, deliverables, and terms. Signed electronically — no paperwork, no delays.

05 Kickoff & Onboarding

PSG schedules a kickoff call within one week of signing. We collect access credentials, confirm brand assets, and begin work. Website discovery begins in week one.
